SUMMARY

An enthusiastic and dedicated fresh graduate Information Technology student from Universiti Teknologi MARA (UiTM) Shah Alam. Have a strong interest in technology particularly in areas such as programming, database, data visualization and system development. Enjoy learning new technical skills and applying them through hands on projects and collaborative teamwork. With a strong sense of responsibility and commitment to delivering quality results, adapt quickly to new challenges and continuously strive to improve. Eager to expand experience in IT industry and contribute effectively to real-world industry environments.

WORK EXPERIENCE

StratAgile Sdn. Bhd., Cyberjaya, Selangor IT Operations

March 2026 – July 2026

- Collaborated with cross-functional teams to facilitate task tracking, improve workflow efficiency and provide operational support for high-priority projects and business initiatives.
- Designed the UI for the MBDK Smart Tow management system using AI-assisted tools.
- Developed responsive UI layouts to present as a demo proposal to MBDK.
- Improved navigation structure to enhance feature accessibility and overall user flow.
- Utilized AI tools during the UI design and development process to increase productivity.

Setel Ventures Sdn. Bhd., Petaling Jaya, Selangor Technical Operations

November 2021 – March 2022

- Provided technical support and troubleshooting for application and database issues.
- Monitored production and development environments to ensure system reliability.
- Assisted in maintaining system performance and reducing operational disruptions.
- Improved operational efficiency by maintaining accurate technical documentation and monitoring Setel-enabled stations.
- Managed technical documentation and supported daily system monitoring activities.
- Collaborated with platform teams to improve infrastructure and system performance.

DYODD Sdn. Bhd., Kota Damansara, Selangor IT Support

September 2021 – October 2021

- Assisted in developing and maintaining web and database systems.
- Improved system and network performance through regular updates and support.
- Helped automate tasks to improve work efficiency.
- Identified and implemented system improvements to enhance functionality.
